

ABSTRACT OF THE DISCLOSURE**DIGITAL IDENTITY INFORMATION CARDS**

- 5 A method, program, and system for receiving personal
identification information by means of a
telecommunication device are provided. The invention
comprises sending a communication transmission, and
concurrent with receiving the communication transmission,
10 sending a second transmission, wherein the second
transmission contains personal identification information
about the party sending the communication transmission.
This personal identification information is independent
of the identity of the device used to send the
15 communication transmission and may include such
information as name, telephone number, business name,
address, email, and fax.
